Roadmap Generator

Flutter application

Team:

1. Mirna Mohsen Embaby   section: 14
- Mariam Kamal Elsherbiny   section: 14
- Merna Mohammed Elseady   section: 14

Goals

2. Determining the level of the student in a specific track.

3. Suggesting a suitable track roadmap for the student.

4. Connecting users with other advanced programmers through chatting.

Specifications

1. The user can choose a track.
2. The user takes a 5-question quiz to determine his level.
3. The user is given a roadmap to complete the chosen track correctly.
4. The user can have a chat with other advanced users about the track.

Used technologies

- Intellij IDEA & Android studio using 'Dart' programming language.
